SOLID BIRCH OR OAK ARMCHAIR

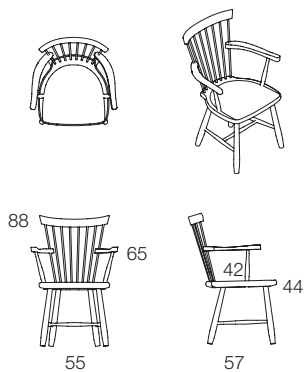

DESIGN: CARL MALMSTEN

9013, 9017

#### SCALE 1:50

#### DETAILS

1. The central pins in the seat provide increased durability.
2. Each back pin is grooved at both ends, providing a larger attachment area for the glue, thus increasing durability. The narrowing of the back pins upwards forms a strong, springy and comfortable back support.
3. The hollowed top section further increases comfort.
4. Recessed seat for greater comfort.
5. Reinforcement in the form of a crossbrace between the chair legs.
