

Bed linen

Care instructions – bed linen

ALWAYS wash in correspondence to the washing instructions for the specific bed set. If 60 degrees are stated you should always wash at 60 degrees and NOT only 40 for instance, as the colours are fixated at 60 degrees.

Wash separately the first three times you launder this garment to prevent dye from bleeding into other colors. Launder as follows:

Turn the garment inside out.

Fill your washing machine only half full when laundering bed linen, to avoid crumbling.

Centrifuge at maximum 800 rpm.

Use a mild, liquid detergent. Avoid detergents with added optical brighteners or bleach, even if your garment is white, ecru or pastel colored.

Tumble dry at a moderate temperature. We recommend that the HE & SHE bed set is NOT tumble dried as this may 'damage' the print.

Iron inside-out.
