

Harbour House

The lovable dolls' house, you never want to pack away. The idea behind the design of the Harbour House is to play with and give a home to figures and toys that children already have. The house loved by all invites your child to play freely as well as fitting perfectly into all children's rooms with its architectural and modern design. Kind on the parents' eyes, when placed in the living room.

MATERIAL The house is made of MDF, for a strong and sustainable foundation. The surface is painted with eco-friendly, non-toxic paint. The pieces are glued together using non-toxic environmentally friendly glue.
