

STRAP MIRROR

By *HAY*

HAY

As Strap/50 and 70 are heavy mirrors, we advise you to secure them with an extra screw in the wall mount on the back of the mirror. After the wall mounts have been attached, place the mirror on the screw, before finally placing the silicone strap around the mirror and the wall mount.

The screws and wall plugs enclosed are suitable for a brick wall. If you are mounting the mirror on a different material you should buy suitable screws and wall plugs.
