## STORYTELLING

### About our bamboo collection

At Tine K Home we are particularly excited about our bamboo collection as bamboo has been a core part of our company from the very beginning. We love bamboo so much, that even after 17 years of designing bamboo furniture, we barely feel like we have started, and are certain that we have only scratched the surface of the possibilities.

We found bamboo in Vietnam of one of our first trips and immediately felt in love. Over time we have further developed the collection and now our collection ranges from small stools to large sunbeds, to tables, couches, tables and everything in between.

Our bamboo collection is hand-crafted in family owned workshops located in the Saigon region. We have worked with the families for many years and we cherish our relationship.

# BAMBOO

## About our bamboo

Bamboo is sustainably produced and grown. As it is the fastest growing plant in the world it reproduces big amount of CO2 and when cut it regrows quickly. In that way bamboo is a great alternative to the slower growing and resource-demanding hard wood. Additionally, bamboo does not require any type of pesticides, fertilizers or herbicides to grow and reproduce effectively.

In short bamboo has amazing natural capabilities of multiplication. It is not a scared resource and it is able to survive and multiply seamlessly. The bamboo poles we select for our production need from 60 days only to 4 years to fully grow.

# CARE

## About caring for our bamboo

Bamboo, like any other natural material, requires care to stay beautiful and last. Here are a few tips to ensure longevity of your new furniture piece:

- 1 We recommend using a cover for your bamboo furniture. You can buy covers on our website.
- 2 Even though your bamboo piece is treated with Woca ® water-based natural exterior wood oil mold may occur due to local weather conditions and it may be necessary to pressure flush your furniture. This is the far easiest procedure – visit our website to view our small guide. Alternatively, hand wash with a mild detergent and a sponge.
- 3 Wipe off spill immediately, to reduce the risk of marks. Any mild detergent may be used.
- 4 After the cleaning process and when the furniture is all dry we recommend that you reapply Woca ® water-based natural exterior wood oil.
- 5 Please store your bamboo furniture in a dry and ventilated spot for the winter season.

Enjoy your bamboo furniture
