

Creative Cork

The organic and hand-painted Creative Cork is functional and fun for all children over the age of 3. The varied shapes and sizes help children develop their cognitive abilities and build upon their spatial awareness. Children learn and understand the use of different shapes, while building towers, cities or other creative constructions. Cork lands softly when dropped and the eco-friendly material becomes the finishing touch to the unique design.

MATERIAL Shaped and formed from 100% natural and sustainable cork the blocks are safe and comfortable for small hands. The 18 pieces are hand-painted with water based, non-toxic paint in Green, Petroleum, Burgundy and Curry. Creative Cork comes in a re-usable organic cotton bag
