

A lamp with an inimitable style, Bourgie is one of Kartell's best sellers, skilfully combining classic style, richness and tradition with innovation and irony.

The baroque style base is composed of three interconnecting decorated layers, while the large lampshade is made with a pleated effect, to create a myriad play of reflections when the lamp is turned on.

The lamp shade's unique attachment system makes three different heights possible which can be adjusted according to the desired use: 68, 73 and 78 centimetres. Bourgie becomes a gorgeous decorative desk or table lamp. Thanks to its flexibility and strong communication value, it can be used on an side-table in the living room, to create atmosphere on your nightstand, as a standing sculpture or for reading.

Following the major success of the transparent, black, gold and chrome versions, Kartell is now offering a new "gorgeous garment" that is opaque white on the outside and gold inside.
