

## Care Instructions

Make sure that you follow the guidelines for drilling holes in this folder.

Screws and plugs are not included as the type depend on the wall the mirror is mounted on. Make sure the the head of the screw is large enough to hold the mirror and small enough to come through the fixture.

The mirror has three fixtures on the back side. It is only necessary to use the two top-fixtures when mounting. Use a spirit level when drilling the two top holes.

### Glass / mirror

Regular cleaning: Clean with a regular, alcohol-free glass-cleaning product, using a soft, lint-free cloth. After cleaning, wipe the surface to remove any excess detergent.

Do not use abrasive cleaning products or those containing ammonia, bleach or other strong solvents, because they may cause scratches. We do not recommend the use of scouring sponges or paper towel.
