

## Mono

### DESIGN WITH NOTE

Mono is a classic and highly-functional chair series, designed in seven variations that easily adapt across home, work and play environments. Its starting point is a gently curving oak base and backrest, allowing the sitter to feel comfortable and supported over long periods. Three different leg options (wood, metal or swivel base) give Mono flexibility for use at home, in offices, hotels or café and restaurant settings.

In addition to its three base options, it comes in a number of variations with optional armrests, wood lacquer finishes (in oak, smoked oak, black and white), and upholstery in a range of Elmo leathers and Gabriel and Kvadrat fabrics. Mono is lightweight and also stackable in its metal leg version, making it especially well-suited to hospitality settings.

### MATERIALS

Mono chair collection has a back and seat in molded plywood. The upholstered version has a seat and back in plywood with polyester and fabric or leather. The base of the chair is made of metal or solid oak.
