Bamboo

Design by
Henrik Pedersen for

HOUE

The Bamboo lamellas on your table are treated with a special impregnation from the factory. In order to keep the table nice, it is important to oil the bamboo lamellas regularly with oil suitable for bamboo outdoor furniture. A high quality clear teak oil can be used.

In order to prevent algae and fungi, it is important that the bamboo is saturated by oil.

The stone is treated with oil and will get lighter in colour with time. If you wish that the granite should have a darker colour again, you can apply stone oil.

Except for the granite, that should be taken in during the winter, the product can stay out all year. However we recommend that the product is taken in during winter as this increases the lifespan.

Ask in the store where the table was purchased for choosing the right oil.

Assembly instructions

Screws and tools are included

Please keep the tabletop in the box until the legs are mounted.

It takes 2 persons to flip the table in order to avoid any damage to the table.

Assembly instruction 97-4002
